THE JAMES HARDIE SAGA

The Inside Story of the Asbestos Scandal and the Biggest Financial Settlement in Australia's History

Ean Higgins

According to Ean Higgins, investigative reporter with *The Australian* newspaper and who has followed the James Hardie story from day one, The James Hardie asbestos saga is the biggest and most Machiavellian corporate scandal in Australian history.

While HIH was, in large part, a matter of woeful mismanagement and neglect, the James Hardie saga allegedly involved a much more deliberate attempt to deceive investors, the New South Wales Government, the Supreme Court and others in a bid to permanently avoid liability for thousands of future victims of the company's asbestos products.

The James Hardie Saga - The Inside Story of the Asbestos Scandal and the Biggest Financial Settlement in Australia's History is a compelling story that will grip you because of its magnitude.

Each riveting chapter begins with a story, or stories, from individuals who have been effected either directly or indirectly by the asbestos scandal. The stories are heartwarming and shocking. You will be outraged.

Ean Higgins takes us on a journey through the minds of the corporate plotters, the lawyers and the asbestos victims involved (many who had no idea that they were being exposed to asbestos....such is the case with innocent children and the elderly). Higgins's interviews

with victims and the victims' families illustrates how they stood to die ghastly deaths without knowing if they would receive compensation and the union leaders, lawyers and directors of the asbestos compensation foundation, the Medical Research and Compensation Foundation, who ultimately brought the company to justice. Accompanied by dramatic, and at times harrowing photographs, *The James Hardie Saga* will shine a brand new light on the role of corporate responsibility versus ordinary citizens. It is a David and Goliath story gone mad!

Ean Higgins is an investigative journalist with *The Australian* newspaper, based in Sydney.

To be launched in Sydney by Premier Bob Carr and ACTU Secretary Greg Combet. Two part national extract in The Australian appearing on the Saturday prior to release, concluding Monday. Extensive reviews in all major newspapers and magazines and supported by a major radio campaign including ABC radio in all states.

JANINE ALLIS

Business Secrets of Australia's Most Successful Woman Entrepreneur

James Kirby

Janine Allis is the most successful businesswoman of her generation. Her Boost Juice company is the fastest growing franchise in Australia and she is the highest ranking female on BRW magazine's Young Rich list with an estimated fortune of \$36 million. In the mid-1990's Allis returned to Australia as a single mother with no business qualifications and began a fruit juice company from her home. Today the Boost group is a multinational with outlets across Australia, Asia and the Middle East. In this inspirational book, popular business journalist and author, James Kirby, tells Janine's life story and outlines the key features of her successful approach to business. A charismatic ex-model who has exploited the boom in healthy eating, Allis's story is full of surprises. From her early days in Melbourne night clubs to summers spent as a stewardess on David Bowie's yacht, here is a business story with a difference. This is the third title in Kirby's Business Secrets series following the earlier success of books on Harvey Norman's Gerry Harvey (recently named as one of the 100 'must read' business books by Boss magazine) and paper magnate Richard Pratt. Janine Allis has co-operated fully with the author and publisher, providing photographs and background information previously kept private. She will be available for media interviews and book promotion.

SMALL COMPANY TOP STOCKS

A Guide to 90 Australian Small Cap Companies

Martin Roth

An invaluable new resource for Australian investors, in this new book Martin Roth once again takes the hard work out of stock analysis. With the sharemarket at record highs, investors are left wondering whether the popular big blue chip companies are overpriced. There are 1,700-or-so companies listed on the ASX, the vast majority are small companies. Yet coverage by stockbrokers and by the financial media is overwhelmingly of the larger companies - mainly those within the top 300. *Small Company Top Stocks* presents investors with information on smaller companies - those outside the top 300 - that have a record of stable earnings, in a format similar to *Top Stocks*. All companies in the book must have recorded profits each year for the previous three years (compared to five years for *Top Stocks*). And because many small companies - even some with strong profits - do not pay dividends (preferring to use profits to fund future growth), there will be no requirement for companies to pay dividends (unlike *Top Stocks*, for which all companies must have a five-year record of dividend payments). Otherwise, the strict criteria for entry will be the same as for *Top Stocks*, ensuring that all entrants can demonstrate solid profitability with moderate debt levels.

SPIES AMONG US

How to Stop the Spies, Terrorists, Hackers, and Criminals You Don't Even Know You Encounter Every Day

Ira Winkler

Winkler is the “anti-Mitnick”, the ultimate “white hat”. He physically and technically “broke into” some of the largest companies in the world investigating crimes against them, and afterwards, as part of his job as a high-level employee of the government or huge security consulting companies, told them how to cost effectively protect their information and computer infrastructure. These are the riveting, true stories and case studies of how he did it and how to prevent what he did. The U.S. Defense Information Systems Agency uses several of his case studies as training for undercover U.S. government operatives.

BEGINNING PROGRAMMING

Adrian Kingsley-Hughes

There are many books on the market that cover programming in certain languages, but very few outside of academic circles introduce programming as a topic itself. The goal of this book is to give non-programmers assistance in learning the basics of programming so that they might eventually become a professional developer, or a programming hobbyist. This book will not only help the reader gain new skills, but it will also be beneficial for readers as they want to expand their knowledge on the topic and use that experience to work with other programming languages. This book offers the basic best practices and skills for all novice programmers.

MONKEYING AROUND WITH SHARES

A Tale of Discovering Investment Success

Geoff Wiggins

This book is a tale (a fable of sorts) that tells of the investment adventures of three characters (Monk, Reese and Prim) in an entertaining and engrossing fashion. It invites the reader to follow the story of three monkeys as they come to an understanding of the Australian stock market and the investment world. In a fun and interesting manner, we watch three friends explore a new topic and go on to create personal financial plans for their futures. They attend sharemarket seminars and discuss a great many ideas, ultimately so each character can find their own path to wealth creation: creating a portfolio of stocks and learning how to invest for their future needs and wants. Following in the style of *Who Stole my Cheese?*, *The Richest Man in Babylon* and *Fish!*, this book is designed to inform through the power of storytelling. It is entertaining, educational and highly original!

OVERCOMING THE FIVE DYSFUNCTIONS OF A TEAM

A Field Guide for Leaders, Managers, and Facilitators

Patrick Lencioni

In *The Five Dysfunctions of a Team*, Patrick Lencioni revealed the primary obstacles that prevent most organizations from performing at the highest level. He detailed the five primary dysfunctions found in teams - Absence of Trust, Fear of Conflict, Inability to Commit, Lack of Accountability, and Inattention to Results -- and provides a model for overcoming them. In this Field Guide, Lencioni offers more specific, practical guidance for overcoming the dysfunctions, using assessments, tools, real-world examples, and more. It presents questions that all teams must ask themselves: Are we really a team? Are we ready for heavy lifting? How are we currently performing? It then provides detailed methods for breaking down each of the dysfunctions and addresses frequently asked questions about teams. *Overcoming the Five Dysfunctions of a Team* can be used as the basis for a team training program, or it can be read and its ideas easily implemented by team leaders and members - whether in business, nonprofit, academic, government, church, or any other organization. Its short format helps teams get up and running quickly and effectively.

HOT COMMODITIES

How Anyone Can Invest Profitably in the World's Best Market

Jim Rogers

In *Hot Commodities*, Rogers offers the low-down on the most lucrative markets for today and tomorrow. In late 1998, gliding under the radar, a bull market in commodities began. Rogers thinks it's going to continue for at least fifteen years - and he's put his money where his mouth is: In 1998, he started his own commodities index fund. It's up 165% since then, with more than \$200 million invested, and it's the single-best performing index fund in the world in any asset class. Less risky than stocks and less sluggish than bonds, commodities are where the money is - and will be in the years ahead. In language that is both colourful and accessible, Rogers explains how commodities are the bases by which investors can value companies, markets, and whole economies.

COGNAC

The Seductive Saga Of The World's Most Coveted Spirit

Kyle Jarrard

A history of Cognac, which Victor Hugo called the "brandy of the gods," from its neolithic origins through its turbulent history to its present-day status as a multimillion-dollar worldwide business. The story of Cognac - a French city, region, as well as the brandy - begins 100,000 years ago in limestone bedrock and sweeps through Roman times, the Dark Ages, Middle Ages to its actual birth toward the end of the 16th century with its growing success story culminating in the late 19th century and its struggle through the world wars to an unprecedented postwar boom. Cognac also looks at the state of the art in the industry, from the smallest houses to the best known, including Hennessy, Courvoisier, Martell, and Remy-Martin.

TRUE NORTH

Peary, Cook And The Race To The Pole
Bruce Henderson

This book is about one of the most enduring and vitriolic feuds in the history of exploration. "What a consummate cur he is," said Robert Peary of Frederick Cook in 1911. Cook responded, "Peary has stooped to every crime from rape to murder." They had started out as friends and shipmates, with Cook, a doctor, accompanying Peary, a civil engineer, on an expedition to northern Greenland in 1891. Peary's leg was shattered in an accident, and without Cook's care he might never have walked again. But by the summer of 1909, all the goodwill was gone. Peary said he had reached the Pole in September 1909; Cook scooped him, presenting evidence that he had gotten there in 1908. Bruce Henderson makes a wonderful narrative out of the claims and counterclaims, and he introduces fascinating scientific and psychological evidence to put the appalling details of polar travel in a new context.

FATAL TREASURE

Greed And Death, Emeralds And Gold, And The Obsessive Search For The Legendary Ghost Galleon Atocha
Jedwin Smith

A book based on exclusive access about the search for the treasure of the Spanish galleon Atocha, which sank, greedily laden with many extra tons of plundered treasure in the early 1600s off the coast of Florida, with enormous loss of life. The Spanish empire never recovered from the staggering loss of wealth caused by this tragedy. Mel Fisher made it his mission, starting in the 1970s, to find the potentially billions of dollars of lost gold, silver, and emeralds hidden away as plunder in the galleon, and his search—along with his sons—has yielded enormous riches as well as enormous hardship. Filled with drama; suspense; colourful characters; and rich details of the seafaring life and of Key West, Florida, this book makes extraordinary reading.

DEFYING GRAVITY

Land Divers, Roller Coasters, Gravity Bums And The Human Obsession With Falling
Garrett Soden

Defying Gravity tells the astonishing story of how gravity pioneers transformed an ancient terror - the sensation of falling - into the modern thrill that powers extreme sports, monstrous amusement rides, and a youth culture obsessed with 'getting air'. It's a hair-raising tour, with nineteenth-century parachutists plummeting to their deaths before thousands, British lords tumbling from Alpine peaks, Hollywood stuntmen dropping from biplanes to freight trains, and drunken carousers outrunning police to make the world's first bungee jump. Garrett Soden follows the evolutionary trail back to out acrobatic primate ancestors and delves deep into the psychology of sensation seekers.
